PROFESSIONAL SUMMARY

Senior Flutter Developer with 9 years of experience building scalable, high-performance Android and iOS applications. Skilled in state management, API integration, clean architecture, Firebase, and performance optimization. Experienced in end-to-end mobile delivery including UI implementation, release support, and Agile collaboration with product, design, and backend teams.

TECHNICAL SKILLS

Flutter Development, Android Application Development, Android Studio, Clean Architecture, MVVM, State Management, API Integration, Firebase, Performance Optimization, Security Management, DevSecOps, CI/CD Pipelines, Agile Methodologies, Application Development

PROFESSIONAL EXPERIENCE

Senior Software Engineer L2

Puresoftware Technology Pvt Ltd | September 2023 - February 2026 | Noida, India

Roles and Responsibilities

- Owned end-to-end Flutter development covering UI implementation, state management, API integration, performance optimization, and release support.
- Built robust, scalable, modular, and API-centric mobile infrastructures for Banking, Digital Wallet, and Trading applications.
- Implemented DevSecOps practices and CI/CD pipelines for I-Trust and Absa Banking to automate build, security checks, testing, and release.
- Analyzed customer requirements and proposed technical solutions aligned with product and security needs.
- Delivered unit-tested features within agreed timelines and collaborated with management and internal teams on design status and project progress.
- Supported Android and iOS delivery from a single Flutter codebase.

Highlights

- Delivered I-Trust, a real-time Trading and Investment Flutter app for live market data and portfolio management, with DevSecOps-enabled CI/CD pipelines for secure, reliable releases during trading hours.
- Developed Absa Banking, a secure Banking and Digital Wallet app enabling account management, transfers, and customer service requests on Android and iOS, supported by CI/CD pipelines and DevSecOps controls.
- Built Lestari Banking, a cross-platform Banking and Digital Wallet application focused on secure transactions and customer service workflows.

Senior Software Engineer

Indipaisa Payment Services | March 2022 - September 2023

Roles and Responsibilities

- Developed scalable, modular, and API-centric mobile infrastructures for payment and merchant products.
- Collaborated with cross-functional teams to design software solutions and plan sprint deliverables.
- Identified and resolved complex technical issues to improve application functionality.
- Managed UI/UX updates and API changes to keep sprints on track.

Highlights

- Delivered Indipaisa Advisor to simplify sales pipeline management and improve field productivity.
- Built Indipaisa Business App so merchants could track sales, view real-time statistics, and receive payment notifications.

Android Developer

Bestone Industries Private Limited | May 2021 - March 2022

Roles and Responsibilities

- Partnered with UI/UX designers to implement fully functional native Android applications.
- Managed the Android application lifecycle from planning through deployment and production support.
- Developed features using MVVM architecture to keep the codebase maintainable.
- Optimized app performance and addressed issues identified through crash analytics.

Highlights

- Improved application stability by using MVVM and crash-analytics driven fixes.
- Streamlined release readiness through structured planning, development, and post-release support.

Android Developer

Angiratech Technologies Pvt Ltd | March 2017 - June 2019

Roles and Responsibilities

- Developed visually appealing Android applications focused on user experience.
- Worked with cross-project teams to build user-driven apps based on customer feedback.
- Integrated libraries and APIs to extend application functionality.

Highlights

- Contributed to consumer Android products including social, gaming, education, and e-commerce experiences such as Meest App, Games91, School Trick App, and DryFruitswala.
- Meest App: social sharing with live streaming, video chat, and user engagement features.
- School Trick App: teacher and student attendance tracking with communication between teachers and families.
- DryFruitswala: e-commerce Android app for dry-fruit shopping.
- Games91: fantasy-based online gaming product development.

Software Engineer

Data Infosys Limited | December 2015 - January 2017

Roles and Responsibilities

- Collaborated with backend teams to implement and consume APIs.
- Wrote scalable and maintainable code to support long-term product stability.
- Enhanced existing systems through integration of new technologies.

Highlights

- Strengthened client applications by delivering reliable API-backed features.
- Improved maintainability of existing modules through cleaner, reusable code.

Trainee Android Developer

HTS Solution Solutions Pvt Ltd | July 2014 - October 2015

Roles and Responsibilities

- Developed Android applications using core Java and Android Studio.
- Completed on-the-job training covering industry processes and development practices.
- Supported onboarding of new trainees.

Highlights

- Built a foundation in native Android development, Android Studio, and team delivery processes.

KEY PROJECTS

- I-Trust: Real-time Trading and Investment Flutter app for live market data and portfolio management, with DevSecOps and CI/CD pipelines.
- Absa Banking: Secure Flutter Banking and Digital Wallet app for Android and iOS, with DevSecOps and CI/CD pipelines.
- Lestari Banking: Cross-platform Banking and Digital Wallet app for secure transactions and customer services.

- Indipaisa Advisor: Sales pipeline management mobile app.
- Indipaisa Business App: Merchant sales tracking with real-time statistics and payment notifications.
- Meest App: Social sharing app with live streaming and video chat.
- Games91: Fantasy online gaming product.
- School Trick App: Attendance tracking and teacher-family communication.
- DryFruitswala: E-commerce mobile app for dry fruits.
